### Alireza G. Nikroo ~ page 2

### **Relevant Experience:**

### **Research Associate**

University of Washington, Seattle

Member of a unique scientific community of clinicians and scientists using genetic tracking of poached elephant ivory at the Center for Conservation Biology. Under the mentorship of the center director, Dr. Sam Wasser, worked on several ecological forensics including the optimal method in extracting DNA from elephant ivory and worked alongside other undergraduates on geographic-based, mapping of elephant gene frequencies.

### **Research Associate**

University of Washington, Seattle

Research conducted with Dr. Keiko Torii regarding the developmental biology behind stem cell renewal, cell-cell communication, and tissue patterning of stomata development. Investigated multicellular plant differentiation using Arabidopsis guard cells through protein biochemistry and live imaging.

Seattle, WA
