**RESEARCH EXPERIENCE**

---

**Wayne State University, Detroit, Michigan** 1996 - 1999

- Prepared testing materials required to culture prostate cancer cells, in addition to making culture media to ensure proper preservation of cells prior to testing.
- Conducted experiments in accordance with test plan for observing invading effects of prostate cancer cells when introduced to a tissue barrier.
- Documented and analyzed test results and reviewed results with scientists.
- Maintained quality control procedures to ensure viability of cells and validity of test results.
- 
- Performed experiments on prostate cancer cells to observe the ability of the cells to invade tissue membranes once pre-treated with an ant-testosterone hormone.
- Resulted in preliminary data determining that after a concentration of extracellular matrix protein exists prostate cells will be able to invade.
