Master of Science in Nursing Post-Master's Certificate 2018 Charles R. Drew University of Medicine & Science  
Master of Science in Nursing (MSN) 2015 Charles R. Drew University of Medicine & Science  
Bachelor of Science (BS), Biology 2011 University of La Verne 2011

**CERTIFICATIONS** American Academy of Nurse Practitioners National Certification (FNP-C)-*Current*  
Registered Nurse (RN) - *Current* | BLS - *Current* | ACLS - *Current*

### PROFESSIONAL SUMMARY

**NURSE PRACTITIONER** with extensive skill and experience in Emergency Medicine, Urgent Care, Orthopedic Practice and Occupational Health. Lead clinician with training and management responsibility of the Occupational Health (OH) Clinic, while maintaining the health, safety, and productivity of staff by providing high-level clinical services within an onsite clinic to ensure swift return to work at full capacity and health.

Skilled in delivery of high-quality care, to diverse and underrepresented population, in high-acuity and emergent situations. Diagnose and treat both chronic and acute disorders, interpreting critical diagnostic tests and examinations, establishing effective healthcare plans, and maintaining detailed records that enable physicians to evaluate plan effectiveness. Skilled in initiating drug therapy by evaluating for reactions and effects of drugs and distinguishing the characteristics of mental and emotional disorders. Fully committed to the highest standard of healthcare and professional excellence, with exceptional team building, communication, and organizational skills.

Work efficiently within a high-pressure environment and make critical decisions using evidence-based practice with sound judgment. Able to interact with all levels of medical staff, hospital personnel, patients, and family members. Plan, implement, and evaluate patients' continuum of care as well as post-acute needs through a combination of academic, pharmaceutical, and clinical knowledge with the ability to calm fearful, grieving, and confused patients and families as an empathetic listener and communicator.

### PROFESSIONAL EXPERIENCE

**Family Urgent Care & Industrial Clinic- Encino, CA 2019 - Present** *Nurse Practitioner (NP)*

- Provider for acute medical care for non-life-threatening conditions such as concussions, common cold, skin rashes, infections, asthma, as well as some preventative, primary care, and pediatric services.
- Work alongside an orthopedic surgeon in the diagnosis and preoperative, operative, and postoperative treatment of diseases and injuries of the musculoskeletal system such as, bones, joints, muscles, ligaments, tendons, and nerves and treat conditions such as, arthritis, dislocations, fractures, sprains, and strains, muscle, ligament, and tendon damage, Osteoporosis, and spine disorders.
- Deliver Regenerative Medicine using cutting edge medical research and treatment such as Stem Cells, Exosomes, Peptides and Platelet Rich Plasma (PRP), to treat painful joints, backs and chronic nerve pain and autoimmune diseases, through minimally invasive procedures.

**Amgen - Thousand Oaks, CA 2022 – 2023** *Nurse practitioner – Occupational Health*

- o Managed training for new NP's and NP students, for a period of six months offering continuous guidance, mentorship and best practices while providing constructive feedback.
- o Serve as a nurse educator for preventative care, safety and maintaining optimal health and wellness when interfacing with patients.
- o Provide primary health services for the worksite population by providing all aspects of medical management for workplace injury and illness including physical assessment, diagnosis, pharmacologic and non-pharmacologic treatment modalities, and consultation.
- o Perform medical surveillance exams and international travel health consultations. o Ensure OH compliance with State, Federal, and OSHA medical guidelines while maintaining the ethical, legal, professional requirements, applicable regulations, and corporate policies and procedures. o Responsible for the Bloodborne Pathogen Program, AED programs and response to site medical emergencies

**LAC + USC Medical Center – Los Angeles, CA 2017 – 2022** *Registered Nurse (RN) – Emergency Department*

- o Provide professional nursing care for a diverse patient population with different medical needs, stages of health, and risks by organizing and prioritizing, at the Emergency Department of Level I trauma center, within the 600-bed hospital.
- o Interfaced daily with patients and families facing fear, pain, shock, and confusion, serving as a composed, empathetic listener and communicator and help families remain calm and understand the situation.

**Centinela Hospital Medical Center – Inglewood, CA 2016 – 2017** *Registered Nurse (RN) – Telemetry*

- o Administrated care for Telemetry patients, relaying results of cardiac monitoring, diagnostic studies, and symptomatology to attending physician.
- o Responded quickly and accurately to changes in condition and responses to treatment, augmenting patient health and safety.
- o Executed physician orders, managed medication administration, and provided education to patients and families, leveraging interpersonal skills to build rapport and trust with each individual.

**Amgen, Inc. – Thousand Oaks, CA 2012 – 2013** *Bioanalytical Chemist II*

- o Delivered formulation and analytical support for drug product formulation development and characterization to improve the physical and chemical stability of protein therapeutics. o Employed analytical techniques including HPLC (size exclusion, reversed-phase, and ion exchange), capillary electrophoresis, and subvisible particle monitoring by HIAC, pH, and osmolality measurements. o Managed samples in laboratory information management system PD-LIMS and conducted data mining from complex data sets of biologic readouts; documented experiments using electronic laboratory notebook (ELN) system.

**Olive View – UCLA Medical Center – Los Angeles, CA 2011 – 2014** *Microbiology & Immunology Laboratory Assistant*

- o Processed specimens such as blood, urine, feces, pulmonary fluids, gastro-intestinal fluids, body fluids, and respiratory samples by performing primary inoculations of test material to be cultured, as well as by smearing and staining test specimens on laboratory glass slides.
- o Prepared specimens in the Immunology Lab, performing calibrations, running controls, and loading samples for analysis.

**Phenomenex – Torrance, CA 2010 – 2011** *HPLC Chemist*

- o Executed timely and accurate testing of various columns, including silica-based and polymeric-based columns as well as particle and monolithic HPLC columns, in adherence with standard protocols. o Analyzed data and reported test results, completing all required documentation and database entries as necessitated by quality control (QC) operating procedures.
