## **RESEARCH & TEACHING EXPERIENCE**

Podiatric Resident Research Project at Silver Lake Medical Center, Los Angeles, CA. 2008-2009.

This project studies the drug delivery of multiple medications utilizing transdermal technology for patients who suffer from complex regional pain syndrome. This study is geared towards the design of a new medical device to treat patients with foot and ankle trauma. The research is documented in journal article *Application of Transdermal Technology for Complex Regional Pain Syndrome*.

Currently in progress. This research project is under the supervision of Nicklas Grumbine DPM; one of the most well known podiatric surgeons in Southern California.

Independent Research. 2005-2007. Invented Transdermal Antibiotic Applicator, a new technology, electroporation, to treat Diabetic lower extremity infection. The device design and related research

protocol was developed under the supervision of Dr. Mark Pittlekow, the dermatology research director of Mayo Clinic

Podiatric Resident Research Project at Larkin Community Hospital, Miami, FL. 2003-2005. Established the first research volunteer program in Larkin and recruited and led college students in podiatric research. Studied the effectiveness of bone biopsy in diagnosing osteomyelitis. The study was done by collecting data from the past surgery; as well as performing bone biopsy and collecting new data. The research study is documented in journal article *The Accuracy of Bone Biopsy in Diagnosing Osteomyelitis*, which was submitted to *Journal of Foot and Ankle Surgery* and *Journal of American Podiatric Medical Asso.*

Biochemistry Tutor at Basic Science Department, Scholl College. 1999 to 2000. Assist 1<sup>st</sup> yr podiatric students to understand the basic concepts of clinical biochemistry.
